

## ***Shotgun 207 N. Cedar Avenue***

*Tradition has it that if you fire a shotgun through the front doorway of this long, narrow home, the bullet will exit directly through the back door. The style is characterized by a single story with a gabled roof. Shotguns are usually only one room wide, with each room leading directly into the next. Exterior features include a vent at the gabled ends and a full front porch.*

*However this house features a simple covered front doorway. Mail-order plans and parts for shotgun homes were widely available at the turn-of-the-century, making it a popular, low-cost structure to build in both urban and suburban settings.*
